CAMPO CAPITAL

Proposal

Decarbonization Roadmap and Carbon Footprint

October 2026

Commercial Proposal

1. Description:

In response to global environmental challenges, corporations are joining the fight against climate change through sound sustainability strategies aimed at reducing the negative impact of their operations and offsetting their emissions through various mechanisms.

This sustainability strategy begins with calculating the company's carbon footprint to determine the scale of greenhouse gas (GHG) emissions associated with its activities. This is followed by an assessment to identify the most appropriate ways to reduce emissions and jointly determine actions to offset the impact generated.

Campo Capital draws on its experience and technical expertise to offer this Decarbonization Roadmap service to companies and organizations seeking to meet their sustainability commitments. We calculate the company's carbon footprint and deliver a roadmap outlining mitigation actions and offsetting alternatives that have been assessed from both a technical and financial perspective.

2. Technical and Methodological Scope:

The Decarbonization Roadmap is structured around three main phases, each with its own deliverable. The full service may be contracted, or clients may engage us starting from the phase they consider most relevant.

Fase	Actividad
Phase 1. Carbon Footprint	Define organizational and operational boundaries and collect activity data. Measure the company's greenhouse gas (GHG) emissions in accordance with the GHG Protocol or NTC-ISO 14064-1.
Phase 2. Identification of Feasible Reduction and Removal Sources	Analyze key emission hotspots and conduct a technical and financial assessment of feasible measures for emissions removal and reduction within the company.
Phase 3. Implementation Plan	Develop a roadmap with short-, medium-, and long-term targets, together with actions, a timeline, responsible parties, and monitoring indicators to implement emissions reductions over the defined period.

3. ¿Why Campo Capital?

3.1. Benefits of working with us:

Engaging Campo Capital for this service enables you to:

- Work with a specialized team experienced in international standards for carbon footprint accounting (GHG Protocol and ISO 14064-1).
- Build long-term relationships with Campo Capital as a partner in achieving your sustainability goals, complementing emissions-reduction efforts by providing access to our available portfolio of carbon credits.
- Receive reports structured in accordance with international standards, which can serve as inputs for your sustainability reporting and the management of your decarbonization roadmap.

3.2. Campo Capital Experience:

Campo Capital S.A.S. is a Colombian company established in 2010 as an agroforestry investment manager in Colombia. Our purpose is to bring real nature-based projects and solutions to rural areas that maximize economic, social, and environmental returns.

We currently focus on the financial structuring, administration, and management of agricultural and forestry projects; consulting services in this sector; and sustainable solutions for stakeholders with natural assets or companies required to undertake environmental offsets. Our Sustainable Solutions team has the technical knowledge and direct experience to guide you throughout the development of carbon credits for your project, from the initial assessment through certification, providing you with peace of mind through the support of a specialized team with experience in the sector. The team also structures emissions-reduction projects and certifies carbon credits through nature-based solutions (NbS). The main objective of these projects is to generate economic, environmental, and social benefits, while promoting climate change mitigation and progress toward the Sustainable Development Goals (SDGs).

<u>Our key achievements</u>

- To date, we have mobilized more than USD 120 million in capital across more than 20,000 hectares, comprising USD 70 million in invested capital and USD 50 million in capital committed for investment over the next four years.

- We have managed 1,300,000 carbon credits in the Verra Registry, which are currently on the market.
- We have conserved 7,000 hectares of high conservation value areas and structured REDD+ carbon credit projects covering 250,000 hectares in the Peruvian Amazon rainforest.
- We have brought together private equity investors and development finance institutions such as FMO and IFDK, UNEP-RSCF, among others.
- We have operated four greenfield projects structured by our team: two agricultural, one forestry, and one agroforestry project.
- We have worked in Colombia, Peru, and Tanzania.
- In 2024, Campo Capital was recognized as the "Most Sustainable Company in the Impact Investment Industry" and "Best Investment Management Company" at the World Finance Innovation Awards. In 2022, Environmental Finance recognized us as Boutique Investment Manager of the Americas for our work in Peru and Colombia.
- Our projects have obtained various certifications, including FSC, Primus GFS, and USDA Organic.
- We have implemented technologies and practices that meet high international standards, including SAP Business One (SAP B1) ERP systems for financial accounting and reporting, and MRV systems using ArcGIS, among others. The financial statements of our investments have been audited by a Big Four firm (EY) for more than 10 years.
  We have participated as speakers at events such as the COPs, New York Climate Week, Nature Finance Forums, and Latin America Climate Week.

<u>Our partners</u>

We have worked with international and local organizations such as the Global Green Growth Institute, the International Climate Fund, Finagro, IICA, Corpocampo NGO, and TotalEnergies, among others. We also have experience working with government entities and private companies in the agricultural sector.

4. Next Steps:

If you are interested in engaging our services, please contact a member of the Campo Capital team by email:

- Schedule an initial meeting with our team to tell us about your company's operations and size.
- Together, we define your sustainability goals and the timeline for implementing your decarbonization roadmap.
- We finalize the fees, present a formal financial proposal, and begin the service.

"Towards a sustainable future. Together, we move forward."
